

Sportwall Interactive Fitness Systems

Profitable Solutions as Simple as 1-2-3

Sportwall Has Gone The Extra Mile To Ensure A Quick Return-On-Investment At Your Facility

The extras we provide in service, programming, POS Marketing kits, and Leasing, are designed to help our customers get a quick return on their investment. These include:

Design Assistance With Choosing The Best Location For Your Equipment: Installing your Interactive fitness equipment in the right location is critical to ensure that you get the best return on your investment. Send us a photo of the location you plan to install our equipment and we will design in the equipment so that you can see how they will fit in your location. This service is free so please take advantage of our offer to ensure that you have chosen the best location for our products. Remember, while we appeal to children, our products appeal to people of all ages so choosing a space that everyone can enjoy, will give you greater usage and therefore greater return on your investment. Try to avoid heavily used basketball courts as they prevent full commitment to the product and therefore undermine your ability to enjoy the full benefit of your investment.

POS Marketing Kits: Our banners, advertising artwork, table toppers, post cards, and stickers do a great job at promoting the arrival of your product at your facility. Ask for your kit to be delivered as soon as you place your order so that you can prepare your members for the arrival of your interactive equipment.

Our Programming: Elementary and Middle School, High School, Fitness Instructor Training Manual, and Junior Playground Manuals are already available. Coming soon will be Programming manuals for the Exerstation Pro, Performance PT, DDR, and Trazer. The first copy is supplied free with your purchase and additional copies are downloadable from the web-site or can be ordered from us at our printing cost. Check out our programming on the web-site and make sure all of your trainers have their own copy www.sportwall.com. We also invite you to dialog with our Regional Program Development Managers to ensure new ideas are constantly being shared with your staff. Additional retraining is available to cover for staff turnover. It is our intention to assist you in keeping your staff fully trained so that Sportwall stays exciting and alive at your facility. No other company focuses this heavily on programming. It is the most important part of our business as it ensures sustained use and profitability at your facility.

Leasing: Ask about our leasing options. Spread the investment in your new profit center over a 3 or 5 year lease. Our leasing program will cover all costs of all equipment, facility modifications, staffing, and services, under one lease making it easy to turn a profit quickly.

Sportwall's Platinum Service and Software Upgrade Plan: We understand that down time means lost ROI to you and we understand that it takes more than just great products to grow your business and make a profit. In order to ensure minimal down time, you need more than a traditional manufacturers' warranty. It takes a committed team of people who stand behind your product. At Sportwall, every customer automatically receives our **Platinum Service and Software Upgrade Plan** for the first year. Standard manufacturers' warranties are not designed to keep you up and running and shipping costs for returns and parts stack up. If your facility is a revenue producing site or if you are a school, you need assurance that everything will be done to reduce and eliminate down time at minimal cost or no cost to you. Every Sportwall customer gets the first year included and we highly recommend that you sign up for additional years. This will assure you of the best service from a team of qualified, trainers, programmers, technicians, and service staff; continuous retraining of your staff when you incur staff turnovers; and the latest versions of software, programming, training and service for the life of your system.
